**PROGRESS REPORT ON THE LEAST DEVELOPED COUNTRIES FUND
AND THE SPECIAL CLIMATE CHANGE FUND**

Recommended Council Decision

The LDCF/SCCF Council, having reviewed document GEF/LDCF.SCCF.30/03 *Progress Report on the Least Developed Countries Fund and the Special Climate Change Fund*, welcomes the report and takes note with appreciation of the progress made under the LDCF and the SCCF.

EXECUTIVE SUMMARY

1. This report provides an update on the progress made in the operations of the Least Developed Countries Fund (LDCF) and the Special Climate Change Fund (SCCF) during the reporting period between November 1, 2020 and March 31, 2021. The financial status updates are of March 31, 2021.
2. As of March 31, 2021, total cumulative pledges and signed contribution agreements to the LDCF amounted to \$1,722.26 million from 25 donors. Of this amount, 1,580.01, or approximately 90 percent, had been received. Cumulative LDCF funding decisions by the LDCF/SCCF Council and the CEO amounted to \$1,592.86 million. Resources available for new funding decisions amounted to \$77.63 million.¹
3. The LDCF received approximately \$60.87 million in new pledges during the reporting period from six donors. Contributions paid during the reporting period totaled \$84.97 million, from eight donors.
4. Since inception, the LDCF has approved 353 projects. During this reporting period, nine LDCF Full-Sized Projects (FSPs), including three MTFs with the GEF Trust Fund, were approved by the 29th LDCF/SCCF Council as part of the December 2020 Work Program. Five LDCF projects, including one MTF with the GEF Trust Fund, were CEO endorsed for implementation. Annex I provides a full list of approved LDCF projects and programs to date.
5. Seven projects requesting a total of \$60.73 million from the LDCF, inclusive of GEF project financing and Agency fees, are being presented to the 30th LDCF/SCCF Council in June 2021 for approval.² The Work Program constitution follows the operational improvements agreed by the 24th LDCF/SCCF Council in June 2018, as stipulated in the GEF Programming Strategy on Adaptation to Climate Change.³
6. As of March 31, 2021, 51 least developed countries (LDCs) had accessed approximately \$12.20 million in support of the preparation of national adaptation programs of action (NAPAs). LDCF support toward national adaptation planning (NAP) processes totaled \$60.33 million as at March 31, 2021.⁴ This support includes projects that explicitly seek to advance NAP processes in countries, in addition to technical assistance for tailored one-on-one support through the LDCF-financed NAP Global Support Program. Notably, several projects combined requests for funding to support NAP processes with requests to support concrete adaptation investments for NAPA

⁴ As the GEF Secretariat has been re-evaluating its NAP portfolio, the total value has been adjusted since the last report.

implementation. Global projects amounting to \$13.69 million had been approved to support the NAP preparation process in LDCs, and the implementation of elements of the LDC work programme other than NAPAs.

7. The LDCF portfolio seeks to reduce the vulnerability of nearly 25 million people. Also, 193 LDCF projects are supporting countries in their efforts to integrate climate change adaptation into 2,183 regional, national, sub-national and sector-wide development policies, plans and frameworks. The LDCF further assists countries in laying the groundwork for climate-resilient development through 89 projects that enable countries to strengthen their national climate information services network.

8. The Secretariat has successfully completed consultations with 17 countries with technically cleared project(s) in the GEF-6 LDCF pipeline to ascertain the viability of these projects in alignment with the respective countries' current priorities for LDCF support in 2020. With the approval of the June 2021 LDCF Work Program, all 17 countries have successfully accessed LDCF resources in GEF-7.

9. As for the SCCF, cumulative pledges amounted to \$356.09 million as of March 31, 2021. Of the total resources pledged, \$349.44 million or approximately 98.1 percent had been received. Cumulative SCCF funding decisions by the Council and the CEO amounted to \$363.68 million.⁵ Since its inception, the SCCF has approved support for 86 projects, including 13 MTFs.⁶

10. During the reporting period, no new projects or programs were submitted for SCCF, and none were approved.

11. The SCCF projects aim to directly reduce the vulnerability of nearly 7 million people.

12. Continued progress made by the Challenge Program for Adaptation Innovation suggests it has strong potential to effectively address unmet needs for climate change adaptation innovation. In December 2020, the 29th Meeting of the LDCF/SCCF Council approved recommendations for further maximizing the impact potential of the Challenge Program for Adaptation Innovation.⁷ The GEF Secretariat has begun initial preparations to launch a second Call for Proposals in mid-2021.

INTRODUCTION

1. This report provides an update on progress made in the operations of the Least Developed Countries Fund (LDCF) and the Special Climate Change Fund (SCCF) since the inception of the two funds, as well as specific activities during the reporting period of November 1, 2020 to March 31, 2021. Table 1 below presents a summary of LDCF and SCCF operations, including total cumulative pledges, paid contributions, and project approvals.

2. As the GEF continues to adapt to the evolving impacts the COVID-19 crisis is having on its business, a set of issues have been identified and specific actions have been incorporated in the different phases of the project review cycle of the GEF Trust Fund and LDCF-SCCF projects. These actions have been developed and continuously updated in active consultation within the GEF Partnership to mitigate COVID-19 risks and ensure efficient and effective design and implementation of LDCF and SCCF resources.

3. One of the actions taken was the CEO provided a universal extension of six months to the current eight- and 12- month deadline for submission of Medium-Sized Projects (MSPs) and Full-Sized Projects (FSPs), respectively, as well as the 12- and 18-month deadline to receive actual CEO endorsement/approval. This universal extension was provided for all projects/child projects under Programs that were approved by or before June 3, 2020.

⁸ Valued at the exchange rates available on March 31, 2021. Please note these figures are subject to currency fluctuations.

⁹ These include Full-Sized Projects (FSP)s, Medium-Sized Projects (MSPs), Enabling Activities, programmatic Approaches with LDCF support and their child projects, including 24 multi-trust fund (MTF) projects with the SCCF and/or the GEF Trust Fund. The number of projects is based information from the GEF Portal as of March 31, 2021.

¹⁰ These include FSPs, MSPs, Enabling Activities, and programmatic Approaches with SCCF support, including 13 MTF projects with the LDCF and/or the GEF Trust Fund. This data is based on information from the GEF Portal as of March 31, 2021.

¹¹ This amount does not reflect the projects being presented in the June 2021 LDCF Work Program.

¹² This amount comprises \$3.42 million under the SCCF-A and \$7.18 million under the SCCF-B.

¹³ One additional project has been CEO endorsed on November 17, 2020.

¹⁴ This data is based on information from the GEF Portal as of March 31, 2021.

4. At 59th Meeting to the GEF Council, the Secretariat presented the paper titled *The Impact of COVID-19 on GEF Project Preparation and Implementation: Overview of Responses from Across the GEF Partnership*, which also had relevance to operational aspects of preparing and implementing LDCF and SCCF projects.¹⁵ The paper reported on information received through surveys with agencies, consultations with countries and discussions at the Agency retreat, as well as the challenges have been varied and the Agencies have taken measures to address them. The Council approved an exceptional authorization for the CEO to grant exceptions to the Project Cancellation Policy, for a total of up to 24 months and for all projects types, effective through the final day of the GEF Council meeting scheduled for June 2021.

5. Since June 2020, the GEF Partnership has also been investigating opportunities and taking actions to ensure GEF investments in climate adaptation contribute to addressing the full effect of the COVID-19 pandemic. This includes analyzing and integrating pandemic associated risks, impacts and opportunities into the business of the LDCF and SCCF. The LDCF and SCCF will continue to deepen its investment in opportunities to mitigate impacts of COVID-19 to deliver climate adaptation and resilience benefits and contribute toward green recovery and building back better.

6. During this reporting period, the GEF Secretariat has continued to improve its data management system and reporting functionalities through the GEF Portal, which is reflected in the LDCF and SCCF data conveyed in this report.

LEAST DEVELOPED COUNTRIES FUND

Pledges and Contributions to the LDCF

7. As of March 31, 2021, cumulative pledges to the LDCF amounted to \$1,772.26 million. Of the resources pledged, \$1,580.01 million or about 90 percent had been received. As of March 31, 2021, LDCF resources available for funding decisions amounted to \$77.63 million.

8. A total of \$60.87 million in new pledges were made during FY21 up until March 31, 2021, by Belgium, Canada, Finland, Ireland, Netherlands, and Switzerland. Paid contributions totaling \$84.97 million were received from Belgium, Canada, Finland, Germany, Ireland, the Netherlands, Sweden and Switzerland during FY21, as of March 31, 2021. Annex V presents detailed Trustee information.

9. Figure 1 shows total annual LDCF contributions finalized per each fiscal year and cumulative contributions.¹⁶

Progress in LDCF Operations

10. During the reporting period, nine projects were approved by the LDCF/SCCF Council as part of the December 2020 Work Program, for a total of \$63.87 million in GEF project financing and Agency fees. These Council-approved projects included three MTFs with the GEF Trust Fund. Annex I presents a list of approved LDCF projects and programs and their status.

11. As of March 31, 2021, the GEF, through the LDCF, has provided \$12.20 million in support of the preparation of National Adaptation Programs of Action (NAPA).¹⁷ South Sudan was the last country to submit its NAPA to the United Nations Framework Convention on Climate Change (UNFCCC) in 2017, bringing the total number of countries that had completed and submitted their NAPAs to 51.¹⁸

12. Cumulative LDCF funding decisions amount to a total of \$1,592.86 million¹⁹, including the preparation of NAPAs. Projects support the implementation of NAPA priorities, the national

¹⁷ This includes two global projects supporting the preparation of NAPAs.

¹⁸ These countries are: Afghanistan, Angola, Bangladesh, Benin, Bhutan, Burkina Faso, Burundi, Cambodia, Cape Verde, Central African Republic, Chad, Comoros, Democratic Republic of the Congo, Djibouti, Equatorial Guinea, Eritrea, Ethiopia, Gambia, Guinea, Guinea Bissau, Haiti, Kiribati, Lao People’s Democratic Republic, Lesotho, Liberia, Madagascar, Malawi, Maldives, Mali, Mauritania, Mozambique, Myanmar, Nepal, Niger, Rwanda, Samoa, Sao Tomé and Príncipe, Senegal, Sierra Leone, Solomon Islands, Somalia, South Sudan, Sudan, Timor-Leste, Togo, Tuvalu, Uganda, Tanzania, Vanuatu, Yemen, and Zambia.

adaptation plan (NAP) process, and other elements of the LDC work programme (see Figure 2). This includes three global projects with LDCF resources amounting to \$13.69 million approved to support the preparation of the NAP process in LDCs, and the implementation of elements of the LDC work programme other than NAPAs.

13. In addition to financing the urgent and immediate adaptation needs of LDCs and the LDC work programme, the LDCF is also mandated to support the NAP process, which is an iterative and ongoing process encapsulating medium and long-term planning for adaptation.²⁰ As of March 31, 2021, total funding from the LDCF toward LDCs' NAP processes amounts to \$60.33million.²¹ This includes projects in Chad, Democratic Republic of the Congo, Djibouti, Guinea-Bissau, Lao PDR, Niger, Rwanda, São Tomé and Príncipe, Senegal, and Timor-Leste. The above includes explicit NAP projects, however, the GEF regularly finances NAP elements within NAPA implementation projects. Additionally, the GEF focuses on the implementation of NAPs, as the GCF supports the formulation of NAPs through its Readiness program. This was included in the GEF's 2018-2022 Climate Change Adaptation Programming Strategy as follows:

“In terms of readiness and NAP formulation, the GCF and GEF are committed to working together to offer streamlined support to countries and to avoid overlap. The GCF has confirmed availability of support for the formulation of NAPs and readiness support for institutional capacity building. Developing countries can access up to \$1 million per country per year for readiness activities from the GCF and up to \$3 million per country for the formulation of NAPs and/or other adaptation planning processes. As such, the LDCF/SCCF support will focus more on the implementation of priorities articulated in the NAP process and other adaptation plans such as NAPAs.”²²

14. The GCF and GEF are committed to working together to offer streamlined and coordinated support to countries and to avoid overlap, including as related to the NAP process. GEF support for NAPs in the GEF-7 period is focused on the implementation of priorities articulated in the NAP process and other adaptation plans such as NAPAs.²³ These projects enable countries to move more effectively towards the integration of climate change adaptation considerations across key policies, plans, programs and decision-making processes,

in line with guidance from the Conference of the Parties (COP) to the UNFCCC,²⁴ as well as a LDCF/SCCF Council decision to operationalize support towards NAP process.²⁵

15. Each project approved during this reporting period or presented for the LDCF/SCCF Council consideration articulates its national priorities and alignment with the NAPA and/or NAP processes. All 47 LDCs eligible for LDCF support in the GEF-7 period has had at least one NAPA implementation project approved under the LDCF. Some LDCs are also utilizing the LDCF resources in the GEF-7 period to support NAP implementation.

LDCF Resource Access for GEF-7 Period

16. For the GEF-7 period starting on July 1, 2018, an initial resource access cap was introduced, under which each LDC can draw up to \$10 million in LDCF resources toward the \$50 million cumulative ceiling during the GEF-7 period.²⁷ The rationale behind the introduction of the cap is to ensure more timely access to resources by as many LDCs as possible, while also

²⁷ The initial cap could be raised in GEF-7, contingent on resource availability.

maintaining the practice of equitable access. Cumulatively, each LDC is eligible to access up to \$50 million from the LDCF (see Table 2).

17. As of the approval of the December 2020 LDCF Work Program, 23 LDCs, or 49 percent of LDCs, have accessed the full initial \$10 million cap for the GEF-7 period. Fifteen more LDCs, or 38 total (81 percent), have successfully accessed LDCF resources since the beginning of GEF-7. The Work Program approved during the reporting period includes Burundi, which has historically low utilization. Previous Work Programs approved in GEF-7 also included countries with low cumulative utilization of LDCF resources, such as Guinea, Liberia, Myanmar, South Sudan, and Yemen.

Agency Involvement in LDCF Projects

18. Since the LDCF inception to March 31, 2021, eleven GEF Agencies have been involved in LDCF projects and programs. According to the GEF Trustee Report, UNDP has the largest share of project funding approvals, with 50 percent; followed by FAO at 13 percent and UNEP at 12 percent, as shown in Figure 3. Other GEF Agencies implementing LDCF projects are AfDB, World Bank, International Fund for Agricultural Development (IFAD), ADB, International Union for Conservation of Nature (IUCN), Conservation International (CI), and UNIDO.²⁸

CEO Endorsements

19. During the reporting period, five LDCF projects totaling \$44.85 million in GEF project financing were CEO Endorsed (see Table 3). Four of these projects are from GEF-6 and one project is from GEF-7. These five projects fall under the revised GEF Project Cancellation Policy which became effective March 1, 2019.

20. The revised Project Cancellation Policy has been applied to improve the operational efficiency of the GEF.³⁰ Under this revised policy, if a FSP is not submitted for CEO endorsement within 12 months of the date of Council approval or if it has not been CEO endorsed after 18 months, the project may be subject to cancellation. All projects approved in the June 2019 LDCF Work Program fall under the revised Cancellation Policy. During the reporting period, all FSPs except one met their submission deadline under the previous Cancellation Policy to submit the full project proposal for CEO Endorsement within 18 months of PIF approval. The actual time between the PIF approval and CEO endorsement of all FSPs during this reporting period ranged from 11 to 17 months, with the average time between PIF approval and CEO endorsement being 15 months. In response to the COVID-19 pandemic, the CEO granted a combined six-month blanket extension on all project deadlines.³¹ Almost all GEF-7 projects that fall under the revised Cancellation Policy have exercised the extension granted by the CEO. Several projects that fall under the previous Cancellation Policy have submitted CEO endorsements packages during the extension period.

21. Since the revised cancellation policy took effect on March 1, 2019, of the projects which have been CEO endorsed with submission deadlines during the reporting period, 11 have submitted their CEO endorsements on time in line with the policy and six have submitted notifications of delayed submission. The remainder have not yet reached their submission deadlines for CEO endorsement.

22. During this reporting period, no requests have been made to delay the final date required for CEO endorsement or approval of LDCF or SCCF projects by invoking *Force Majeure*.

23. The full impact of the COVID-19 pandemic on the LDCF portfolio will become more apparent over time. The GEF Secretariat will continue to monitor this and report any findings in following progress reports. Furthermore, the FY20 Annual Monitoring Report includes a risk assessment and COVID impact.³²

24. In total, 273 projects had been CEO endorsed or approved as of March 31, 2021, including the five approved during this reporting period and reflected in table 3 above.

Expected Results under the LDCF

25. As of the end of this reporting period, 273 LDCF projects had been CEO endorsed or approved³³ In total, 174 implementation-oriented projects that have been CEO endorsed or approved provided an estimate of the number of direct beneficiaries³⁴. Key expected results of these projects, including aggregate values of quantitative indicators, are summarized in Table 5.

26. Full expected results can be found in the results frameworks specific to each project, available in the project documents posted on the GEF website.³⁵

27. In response to the request made at the 14th LDCF/SCCF Council in June 2013, the GEF Secretariat, in its Annual Monitoring Review (AMR) of the LDCF and the SCCF, continues to provide a summary of actual, portfolio-level results of projects that have been completed or that are under implementation. The most recent AMR, reporting results from the 2020 fiscal year is presented at the June 2021 LDCF/SCCF Council.³⁶

28. The GEF's active portfolio of CEO-endorsed or approved projects in various stages of implementation seek to directly reduce the vulnerability of more than 25.3 million people. Within this cohort of CEO endorsed projects, nearly every project reported 50 percent of beneficiaries being women. Given the mandate of the LDCF to support the preparation of the NAP process in LDCs, 193 LDCF projects are already supporting countries in their efforts to integrate climate change adaptation into 2,183 regional, national, sub-national and sector-wide policies, plans and frameworks. The LDCF also assists countries in laying the groundwork for climate-resilient development through 89 projects that will enable countries to strengthen their national climate information services network.

Table 4: Expected Results for CEO Endorsed or Approved LDCF Projects as of March 31, 2021*

*These estimated results include figures from multi- trust fund (MTF) projects financed by the LDCF.

29. The following are examples of projects that were CEO endorsed during this reporting period, with a brief description of their expected results and impacts.

30. *South Tarawa Water Supply Project* (GEF ID 10593); Agency: Asian Development bank; LDCF project financing: \$5,000,000; co-financing \$81.83 million. This child project under the 'Climate Resilient Urban Development in the Pacific' program will be implemented in South Tarawa, the capital of Kiribati. Kiribati is a highly vulnerable LDC SIDS that faces immense challenges due to its geographical remoteness and vulnerability to climate change. The project will focus on enhancing the climate resilience of South Tarawa's water supply sector. South Tarawa has a land area of only 15.72 sq km and its highest point is only 3 meters above sea level, making it extremely vulnerable to wave and wind impacts of coastal storms. A major climate change concern is the risk over 'over-topping', whereby wind, waves and tidal surge combine to enable seawater to flow onto the island and eventually percolate into groundwater lenses. The ADB is working with the GCF on a desalination plant project. LDCF resources will be applied in parallel, in a coordinated manner with the GCF project, to address critical adaptation gaps. Knowledge-generation, institutional strengthening and capacity building measures will be supported by the LDCF grant, as well as assessments of climate change impacts on the water network. It will also strengthen cross sectoral mechanisms to mainstream climate resilience. The LDCF project is expected to directly benefit nearly 90,000 people, and to train 1,000 people about climate risks and adaptation measures. This project takes an innovative approach in proposing to establish a common data/information platform to provide management and decision making support to multiple stakeholders, as well as in proposing strategic use of asset management as a tool to achieve climate resilience, which at the city level is a relatively new approach. The hard and soft measures that will be supported are expected to be replicable on other islands and countries, with some measures specific to atolls, others across the Pacific, and others generally across all SIDS and coastal areas. The project is aligned with country priorities in Kiribati and is being designed to fully coordinate with the GCF desalination project in the country. Risks and opportunities to deliver benefits amidst a COVID situation have been taken

into account. The LDCF resources will be accompanied by over \$54 million in grant co-finance from the GCF, ADB and World Bank.

31. *Building the Capacity of the Lao PDR Government to Advance the National Adaptation Planning Process* (GEF ID 8022); Agency: UNEP; LDCF project financing: \$3.89 million; co-financing \$26.46 million. This project aims to mainstream the coordination and integration of climate change adaptation into national, sectoral and provincial development policy and strategies by strengthening the capacities of relevant ministries, especially for planning, finance and environment, in Lao PDR. The project will support the inclusion of medium- and long-term climate change risks and adaptation options into existing plans and budgeting processes. The project is structured around 4 key components: (i) Improve capacity by raising national awareness of climate change and of the NAP; ; (ii) Undertake climate change risk and vulnerability assessments.; and (iii) Enhance the collection, analysis, dissemination and application of integrated socio-economic and climate change information to guide policymaking and long-term planning across climate-sensitive sectors; and (iv) Monitoring and evaluation. This project will strengthen project-based M&E processes toward a national strategy and put in place the foundations for advancing NAP priorities. The proposed project will mainstream climate change adaptation in 24 policies and/or development plans and provide technical training programs for 1,430 staff (50 percent female). It will also provide indirect adaptation benefits to communities in all 18 provinces/prefectures (130 districts). The project brings highly innovative policy strengthening to Lao PDR in terms of mainstreaming climate change adaptation. This is expected to yield valuable benefits that will set the course for medium- and long-term future adaptation directions.

Results in GEF-7

32. In the GEF-7 period, the Updated Results Architecture for the LDCF and SCCF introduced a set of four Core Indicators that LDCF/SCCF projects are expected to track and report, in alignment with the Updated Results Architecture for the GEF Trust Fund.^{37, 38} These LDCF/SCCF Core Indicators are requested at Project Information Form (PIF) or CEO Approval submission stage, and subsequently at CEO Endorsement, mid-term, and terminal stages. Applicable new reporting features of the GEF Trust Fund for GEF-7, such as the provision of meta-information for projects by Agencies, are also applied to the LDCF/SCCF results framework. The LDCF/SCCF Core Indicators, listed below, contribute to a section of the GEF Scorecard, focused on adaptation to climate change:

- i. Number of direct beneficiaries (gender-segregated, male/female);
- ii. Number of hectares of land under climate-resilient management;
- iii. Number of policies, plans and development frameworks that mainstream climate resilience; and

³⁸ GEF, 2018, [Updated Results Architecture for GEF-7](#), Council document GEF/ C.54/11/Rev.02.

- iv. Number of people with enhanced capacity to identify climate risk and/or engage in adaptation measures (gender-segregated, male/female).

33. The expected contributions towards these Core Indicators from LDCF projects included in the June 2021 Work Program for approval by the 30th LDCF/SCCF Council are presented in the Work Program cover note.³⁹

34. The GEF Policy on Gender Equality and GEF Policy on Stakeholder Engagement also apply to LDCF projects.⁴⁰

Consultations with Countries

35. With the introduction of a new funding cycle for GEF-7, the 2018-2022 strategy recognizes the need to address the pipeline of technically cleared projects from GEF-6. At the end of GEF-6, there were 21 technically cleared projects from 17 countries in the LDCF pipeline requesting a total of \$156 million from the LDCF.

36. Since the beginning of GEF-7, the Secretariat has held consultations with countries with remaining technically cleared projects in the GEF-6 LDCF pipeline.

37. Based on the outcomes of these consultations, all 17 countries⁴¹ with pipelined projects in GEF-6 have been consulted regarding their GEF-6 pipelined projects. All these projects have either been updated or redesigned and approved in GEF-7. The final three were presented in the December 2020 Work Program.

38. Additional consultations were also held with LDCs that do not have GEF-6 pipeline projects, in order to present the current strategy, discuss adaptation priorities, and to assist with programming. These consultations are typically held during GEF ECWs and other in-person opportunities. During the COVID-19 Pandemic, however, in-person discussions have paused, with virtual and/or phone consultations being held as needed and/or requested, most recently with Kiribati and Tuvalu.

39. Additionally, during the reporting period, the GEF, in collaboration with the LDC Group under the UNFCCC, has made targeted outreach efforts with nine LDCs that have not yet accessed LDCF resources in the GEF-7 period. Some of these remaining LDCs have had very low historical access rates. With the intention of leaving no LDCs behind, these discussions provided opportunities to understand their climate adaptation priorities and to assist them to consider requesting LDCF support in line with operational improvements outlined in the 2018-2022 GEF Programming Strategy on Adaptation to Climate Change. The outreach has resulted in

submission of PIFs from five LDCs (Bhutan, Central African Republic, Eritrea, Lesotho and Somalia) for consideration in the June 2021 LDCF Work Program. The remaining four LDCs (Comoros, Madagascar, Niger and Sao Tome and Principe) are at various stages of preparing PIFs for submission. The GEF Secretariat is optimistic that all will have a chance to access LDCF resources before the end of the GEF-7 period.

SPECIAL CLIMATE CHANGE FUND

Pledges and Contributions to the SCCF

40. As of March 31, 2021, 15 donors pledged and signed Contribution Agreements or Contribution Arrangements amounting to \$356.09 million. The Trustee has received \$349.44 million in cash to date from these donors, 98.1 percent.⁴² Figure 4 presents total annual and cumulative SCCF contributions finalized per fiscal year.

41. During the reporting period, no new contributions were received to the SCCF.

Figure 4: Total Annual and Cumulative SCCF Contributions Finalized as of March 31, 2021 (USDeq million)

Progress in SCCF Operations

42. As March 31, 2021, 2020, cumulative funding decisions by the Council and the CEO amounted to a total of \$363.68 million, according to the Trustee report. Of the total amount

⁴² GEF Trustee, 2021, [Status Report for the SCCF](#), LDCF.SCCF.30/Inf.03.

approved, \$322.48 million was for projects and project preparation activities, \$31.61 million was for fees, and \$9.59 million was for administrative expenses and corporate activities of the SCCF.⁴³ There is a total of 86 projects approved under the SCCF.⁴⁴ Annex II presents a complete list of approved projects to date under SCCF-A and B. Figure 5 shows SCCF approvals by fiscal year. This reporting period overlaps two fiscal years.

43. For the GEF-7 period, the number of initiatives approved by the SCCF totals nine, comprising of one FSP and eight MSPs for \$10.21 million in SCCF resources.⁴⁵ Of these, the FSP has been approved by the LDCF/SCCF Council, and eight were approved by the CEO as MSPs. Approximately 44 percent of these projects are MTFs, accounting for four out of the nine projects.

⁴⁴ This data is based on information from the GEF Portal as of March 31, 2021.

⁴⁵ This amount includes \$9.34 million in GEF project financing and \$0.87 million in Agency fees. In addition, these projects have \$0.27 million in PPGs, and \$0.025 million in PPG fees.

⁴⁶ The data reflected in this figure has been generated on reporting information from the GEF Portal as of March 31, 2021. Any discrepancies with data in previous reporting figures are due to improved reporting functionality of the GEF Portal and ongoing reconciliation of relevant datasets.

Approvals and CEO Endorsements

44. No new MSPs or FSPs were approved or endorsed during the reporting period for SCCF resources.

45. Six MSPs with approved PIFs supported by SCCF were being prepared for CEO approval at the end of this reporting period. These PIFs total \$5.91 million in SCCF finance approved during the previous reporting period from November 1, 2019 to October 31, 2020. Three of these MSPs are solely supported by the SCCF, and the other three are jointly supported at MTF projects supported by the SCCF and LDCF. The deadlines for these six MSPs to be CEO Approved are between June and November 2021. Five of these MSPs are projects within the Challenge Program for Adaptation Innovation.

46. The five MSPs being prepared for CEO Approval with support from the SCCF as part of the Challenge Program for Adaptation Innovation are continuing to test and demonstrate innovative approaches for adaptation innovation, particularly in partnership with private sector actors who are not traditional partners for the GEF. Further information on progress being made through the Challenge Program for Adaptation Innovation is provided below.

47. An additional MSP with its PIF approved in the previous reporting period and that was CEO Approved in April 2021 shortly after the current reporting period is targeting systems innovation to increase investment in nature-based infrastructure by strengthening valuation of ecosystem services for climate adaptation and resilience. This project, titled *Using Systemic Approaches to Scale Nature-Based Infrastructure for Climate Adaptation* (ID 10632, SCCF project financing: \$2.19 million⁴⁷; co-financing: \$3.59 million), will be implemented by UNIDO, in partnership with the MAVA Foundation and the International Institute for Sustainable Development.

48. Two MSPs supported by the SCCF had CEO approval submission deadlines during this reporting period. One of these CEO approvals was submitted before its original deadline, and an extension of submission was requested and granted for the other due to delays resulting from the COVID-19 pandemic.

Agency Involvement in SCCF Projects

49. As of March 31, 2021, thirteen GEF Agencies were involved in SCCF projects totaling \$322.48 million in project financing.⁴⁸ The World Bank holds the largest share of the portfolio at

⁴⁷ This figure does not include PPG and PPG fee.

Expected Results under the SCCF

50. By the end of the reporting period, 82 out of 86 SCCF projects have been approved⁵¹ or endorsed by the CEO. Of these projects, 42 have already been implemented and completed.⁵²

51. Table 5 provides a summary of the quantitative results indicators from a critical mass of these projects. These indicators are aligned with the results framework that was introduced in the GEF-6 period, similar to the LDCF results. Full expected results are detailed in the results frameworks specific to each project, available in the project documents posted on the GEF website.⁵³ In response to a request made at the 14th LDCF/SCCF Council in June 2013, the Secretariat, in its Annual Monitoring Reviews of the LDCF and the SCCF, continues to provide a summary of actual portfolio-level results of projects.⁵⁴

52. In total, 58 projects provide an estimated number of direct beneficiaries at the CEO endorsement/approval stage. These projects aim to directly reduce the vulnerability of close to seven million people. Furthermore, 57 SCCF projects support countries in their efforts to

develop or strengthen an estimated 417 policies, plans, and processes that identify, prioritize, and integrate climate change adaptation strategies and measures. Additionally, 47 projects train an estimated 116,673 people to identify, prioritize, implement, monitor and/or evaluate adaptation strategies and measures.

Number of policies, plans, and processes developed or strengthened to identify, prioritize, and integrate adaptation strategies and measures	57	417

* These estimated results include figures from MTF projects financed by the SCCF.

53. In the GEF-7 period, the LDCF/SCCF follows the GEF policy for reporting on Core Indicators, as presented in detail in the Expected Results under the LDCF section. All projects approved in GEF-7 will report on the LDCF/SCCF Core Indicators and no longer on the indicators from the GEF-6 results.

MULTI-TRUST FUND PROJECTS (MTFs)

54. To date, there have been a total of 31 projects and six programmatic approaches that draw resources from multiple trust funds. Of these projects, five MTFs draw resources from both the LDCF and SCCF together, and 21 MTFs draw from the LDCF and GEF Trust Fund, while 10 MTFs are SCCF-GEF Trust Fund. One MTF draws resources from the GEF, the LDCF, and SCCF.

55. Prior to GEF-7, different project approval processes and timing for the GEF Trust Fund and the LDCF/SCCF had an effect of limiting the number of MTFs. Projects that combined GEF

⁵⁵ Given the significant share of projects that target agriculture and food systems as a priority sector, this figure includes production systems, as well as other vulnerable land such as catchments and coastal zones.

Trust Fund and LDCF/SCCF resources often comprised components that were separately mapped to various thematic areas, rather than components that sought to integrate the them. The ambition for GEF-7 is to enable better integration and mainstreaming of climate change adaptation and resilience in GEF Trust Fund programming, especially in contexts where vulnerability to climate change is high.

56. Since the roll-out of the new LDCF/SCCF strategy and GEF programming directions in July 2018, the number of MTF proposals that support integration and seek synergy across different global environmental dimensions has increased. This ability to advance integration and mainstreaming of adaptation with support from multiple trust funds is a unique and positive feature of the GEF. The GEF Secretariat will continue its efforts to facilitate such programming as appropriate, taking into consideration national needs, opportunities for systemic impact, and programming priorities.

57. Since the beginning of GEF-7, 18 MTF projects have been approved.

CHALLENGE PROGRAM FOR ADAPTATION INNOVATION

58. The Challenge Program for Adaptation Innovation was launched in 2019, in alignment with the approved adaptation programming strategy for GEF-7.⁵⁶ The objective of this program is to catalyze innovation to harness the power of private sector actors for achieving adaptation results. The Challenge Program aims to test and validate potentially scalable, bankable, or otherwise fundable investment approaches, business models, partnerships, and technologies. One innovative element of the design of this Program is that submission of project concepts can be made by any proponent and is not limited to GEF Agencies. Indications are that this approach may be a useful model to engage an increasing spectrum of actors in presenting and developing GEF programs and projects.

59. A first Call for Proposals was announced in mid-2019 valued at \$10 million to be financed equally from the LDCF and SCCF. The response to the Call for Proposals was overwhelmingly positive. 388 concepts were submitted by 343 different organizations. Given this high level of interest and limited resources available for this round, the Challenge Program was only able to invite nine out of 388 of submissions to advance, totaling under three percent of the approximately \$550 million requested. Of the 388 concepts submitted in the first Call for Proposals, 92 percent were from proponents who are not GEF Agencies. This created opportunity for private sector actors and others who have not traditionally partnered with the GEF to propose their ideas and engage directly with the GEF Secretariat.

60. A detailed analysis of the submissions, including by type of proponent, innovation strategy, region and country, and scale of funding requested is provided in the Progress Report

⁵⁶ GEF 2018, [GEF Programming Strategy on Adaptation to Climate Change for the LDCF and the SCCF and Operational Improvements](#), Council document GEF/LDCF.SCCF.24/03.

on the Challenge Program for Adaptation Innovation delivered to the 27th LDCF/SCCF Council, in December, 2019.⁵⁷ A further update on progress being made through this Program was presented as an Information Document for the 29th meeting of the LDCF/SCCF Council in December 2020, which includes details on the advances and impacts of each of the projects, both individually and as a cohort.⁵⁸

61. The nine project concepts indicated below in Table 6 were selected based on established criteria and were invited to advance following the normal LDCF and SCCF project review process. These concepts were announced on December 11, 2019 at the COP25.⁵⁹

62. Of the nine project concepts invited to advance from the first Call for Proposals through this program, all have had their PIFs approved, and one has had their CEO Approvals fully processed for implementation.

63. The anticipated impacts and co-financing catalyzed through this Challenge Program are substantial, including in relation to the typical impacts scale of other LDCF and SCCF supported projects. Of the \$45.54 million in co-financing expected to be catalyzed from the nine projects, \$29.88 million (65.6 percent) is anticipated from 12 different private sector partners.

64. This Challenge Program has been successful in attracting and engaging a range of new partners with whom the GEF has not yet been able to directly partner with through conventional programming. Several private sector and other partners involved in this program are engaging directly for the first time in a GEF project. These partners include large-scale agriculture commodity managers such as Nespresso, commercial financial institutions such as the Agricultural Development Bank of El Salvador, SME fund managers such as South Pole Group, commercial insurance providers such as Willis Towers Watson, and municipal governments, as well as several SMEs and community organizations. The infusion of ideas and interest submitted suggest there is significant impact potential to be gained from continuing to increase GEF's investment in catalyzing private sector innovation in climate resilience and adaptation through this program.

65. Learning and knowledge sharing is being undertaken through implementation, monitoring, and evaluation. This learning will help strengthen the individual projects' business models and contribute more broadly to the growing movement of private sector investment for climate change resilience and adaptation. Given the pioneering nature of the nine projects in this program, numerous opportunities for synergies and knowledge sharing have been identified and acted upon during PIF approval and project development stages. These synergies and knowledge sharing efforts are being undertaken with a view to strengthen the different and often complementary innovative aspects of each of the projects.

66. Initial progress made by the Challenge Program suggests it has strong potential to effectively address unmet needs for climate change adaptation innovation. Through the call for proposals modality that was open to any proponent whether or not they are a GEF Agency, the LDCF and SCCF have been successful in building new partnerships, unearthing innovative ideas, and catalyzing private sector investment in adaptation that would otherwise not have been possible through the traditional GEF programming model. These partners include large-scale agriculture commodity managers such as Nespresso, commercial financial institutions such as the Agricultural Development Bank of El Salvador, SME fund managers such as South Pole Group, commercial insurance providers such as Willis Towers Watson, and municipal governments, as well as SMEs and community organizations.

67. The Secretariat presented to the 29th LDCF/SCCF Council a set of reflections on the initial stage of this Challenge Program, including recommendations for further maximizing the impact potential.⁶² The GEF Secretariat is currently preparing to launch a second Call for Proposals in mid-2021 with available LDCF and SCCF resources.

OVERVIEW OF CONTRIBUTIONS, COST STRUCTURE AND VISIBILITY

68. The tables presented in this section provide an analysis on increased and diversified contributions, more efficient cost structure, and enhanced visibility of the LDCF and the SCCF. These elements were previously presented in the Annual Monitoring Review as elements of an overview of management efficiency and effectiveness. They have been moved to the Progress Report to be presented along with other elements of the LDCF/SCCF portfolio analysis, included in earlier sections. This information will be included in future Progress Reports once a year, in the Progress Report presented to the fall LDCF/SCCF Council.

⁶³ As indicated in the [Guidelines on the Project and Program Cycle Policy \(2020 Update\)](#), PMCs for FSPs are not recommended to exceed five percent of GEF project financing; while PMCs for MSPs shall not exceed ten percent of GEF project financing. The difference in the percentage rate of PMC against project financing approved for LDCF and SCCF is due to 17 of the 24 approved for LDCF support in FY20 were FSPs, while all the five projects approved for SCCF support were MSPs.

⁶⁴ The difference in the percentage of GEF Secretariat administrative expenses as a share of total project financing approved is due to the relatively high amount of LDCF project finance approved in FY21 in comparison to the relatively small amount of SCCF finance approved.

ANNEX I: APPROVED PROJECTS AND PROGRAMS UNDER THE LDCF AS OF MARCH 31, 2021

- This list excludes Enabling Activity projects, most of which are NAPA preparation projects.
- The list includes Programmatic Approaches (PFDs) and does not list individual child projects to avoid double counting.
- The data are from the GEF Portal, which may include some discrepancies and are under review.
- The financial figures are at the time of the Council Approval and CEO approval for MSPs.

ANNEX IV: STATUS OF GEF-6 PIPELINE OF TECHNICALLY CLEARED PROJECTS

The GEF Secretariat has held consultations with all countries with GEF-6 pipelined projects since the start of the GEF-7 period. All 17 countries who had GEF-6 pipelined projects have submitted proposals, and as of the approval of the December 2020 LDCD Work Program, all have received GEF-7 LDCF support. The proposals submitted by these countries and approved are either based on significant revision and updating of the pipelined projects, or entirely new to addressing current priorities.

GEF ID	Country	GEF-6 Pipelined Project	GEF Agency	Status of Consultations
9458	Togo	Strengthening resilience to climate change of coastal communities in Togo	FAO	Updated and approved in the June 2019 LDCF/SCCF Work Program.
9104	Malawi	Building the capacity of Malawi's government to advance the National Adaptation Plan process	UNDP	New proposal approved as part of June 2019 Work Program.
9543	Timor Leste	Developing capacities for iterative National Adaptation Planning process for climate resilient development	UNDP	New proposal by another Agency submitted as part of June 2021 Work Program.
9244	Lao PDR	Strengthening the Capacities for Iterative National Adaptation Planning Process in Lao PDR	UNDP	New submissions by another Agency approved in the June 2019 LDCF/SCCF Work Program.
9596	Burundi	Landscape restoration project	World Bank	Revised submission approved in December 2020 Work Program.
9538	Zambia	Promoting the adoption and upscaling of proven climate-resilient agricultural practices and technologies by smallholder farmers in Zambia	UNDP	New submission approved in the June 2019 LDCF/SCCF Work Program.
9550	Mauritania	Improved Resilience of Local Communities and their Livelihoods through the Restoration of a Degraded Catchment area in the Wilayas of South-East Mauritania	FAO	New submissions approved as part of December 2018 and June 2020 LDCF Work Programs.
7996	Timor Leste	IkanAdapt: Strengthening the Adaptive Capacity and Resilience of Fisheries and Aquaculture-dependent Livelihoods in Timor-Leste	FAO	Revised as an MTF, updated, re-submitted and approved as part of June 2019 LDCF/SCCF Work Program.
10083	Sudan	Sudan Sustainable Natural Resources Management Project-Additional Financing	World Bank	Updated and approved as part of December 2018 LDCF Work Program.
9689	Ethiopia	Upscaling community-based adaptation in Ethiopia	UNDP	Updated and approved as part of the June 2019 LDCF/SCCF Work Program.
9699	Zambia	Climate change adaptation in forest and agricultural mosaic landscapes	FAO	Updated and approved as part of the June 2019 LDCF/SCCF Work Program.
10105	Guinea-Bissau	Strengthening climate information and early warning systems for climate resilient development and adaptation to climate change in Guinea Bissau	UNDP	Updated and approved as part of December 2018 LDCF Work Program.
9729	Haiti	Strengthening the climatic resilience of the drinking water sector in South of Haiti	UNDP	Revised and approved as part of June 2020 LDCF Work Program.
9175	Sudan	Resilience of Pastoral and Farming Communities to Climate Change in North Darfur – RPFCC	FAO	Updated and approved as part of the December 2019 Work Program.
9763	Uganda	Strengthening Adaptive Capacity and resilience through integrated watershed management under the agricultural value chain development program (AVCP) in Uganda	AfDB	Updated and approved as part of the June 2019 LDCF/SCCF Work Program
9843	South Sudan	Strengthening Climate Information and Early Warning Systems in South Sudan	UNDP	New concept approved as part of the December 2019 LDCF/SCCF Work Program.
9186	Djibouti	Increasing Knowledge and Capacity for Mainstreaming Climate Change Adaptation into Regional Development Plans in Djibouti's Gobaad Plain and Tadjourah Ville	UNEP	Updated and approved in June 2020 Work Program.
9902	Gambia	Improving Water Availability in The Gambia's Rural and Peri-Urban Communities for Domestic and Agricultural Use	AfDB	Updated and approved as part of the June 2019 LDCF/SCCF Work Program
10089	Chad	Strengthening rural and urban resilience to climate change and variability by the provision of water supply and sanitation in Chad	AfDB	Approved as part of December 2018 LDCF Work Program.
9859	Benin	Protection of the coastline and resilience of coastal communities to sea level rise	UNDP	Two updated proposals approved in December 2020 Work Program.

9958	Haiti	Building Resilience in the Wake of Climate Disasters in Southern Haiti	UNEP	Updated and approved in the December 2020 Work Program.
