

Shifting to Electric Mobility

A New GEF-7 Electric Vehicles Programme

Join the global shift to electric no-emissions mobility today!

The world has started a shift to electric mobility. To meet global and national emissions targets it is important that low and middle-income countries are part of this change.

To support this GEF-7 will include a new global programme on electric mobility.

The International Energy Agency (IEA) and UN Environment are leading global agencies supporting this transformation, alongside ADB, UNIDO and ICCT. The IEA is the coordinator of the Clean Energy Ministerial's Electric Vehicles Initiative, while UN Environment is already supporting more than 40 countries with the introduction of electric mobility under the **eMob programme**.

June 26,
13:30-15:00
My Son 2, Ariyana
Conference Centre

Join our panel of experts as we:

- Explore the current state of electric mobility worldwide
- Outline opportunities in the new GEF-7 Electric Mobility programme
- Answer your questions about the programme and how countries can get involved with GEF support

Speakers & panelists

- Erik Solheim, Executive Director, UN Environment
- Pierpaolo Cazzola, IEA
- Rob de Jong, UN Environment
- Tareq Emtairah, UNIDO
- Ki-Joon Kim, ADB
- Ralph Simms, GEF STAP
- Country representatives

Moderator: Christian Zinglensen,
Secretariat Head, Clean Energy Ministerial
