

ACCELERATING ENERGY EFFICIENCY IN BUILDINGS

UNDP SIDE-EVENT, 26 JUNE 2018
13:30-15:00, room Phong Nha

Buildings continue to be the largest consumers of energy worldwide. Policies must prioritize energy demand reduction, incentivize the use of efficient equipment, and reinforce building energy code compliance. Optimizing building control systems, monitoring the use of energy, and user awareness are important tools to reduce energy consumption.

AGENDA

- Opening remarks by Adriana Dinu, UNDP
- Opening remarks by the Vice-Minister of MOC
- Energy Efficiency in the building sector in Viet Nam by Vu Thi Kim Thoa, MOC
- Building Efficiency in Commercial Buildings in Thailand by Pongphat Munkkunk, DEDE
- Building Efficiency Accelerator: Da Nang case study by Dinh Quang Cuong, Da Nang Office of People's Committee
- Energy Efficiency in Buildings under GEF-7, Sunday Leonard, STAP
 - Discussion panel and Q&A
 - Closing remarks by Andrew Steer, WRI
