System for Transparent Allocation of Resources: STAR

GEF Expanded Constituency Workshop Sal Island, Cabo Verde April 21-23, 2015

Background

- The current mechanism by which GEF resources are allocated to countries in three focal areas – Biodiversity, Climate Change, and Land Degradation
- The Resource Allocation Framework (RAF) was the first PBA for the GEF and adopted for GEF-4
- The STAR updated the RAF and was implemented for GEF-5
- The STAR was recently updated for GEF-6

GLOBAL ENVIRONMENT FACILITY

Objectives

• STAR aims to allocate scarce GEF resources within and among focal areas in order to:

- >maximise impact on the global environment
- Promote sound environmental policies and practices

- >meet convention requirements
- match country driven priorities

Calculating STAR allocations

INVESTING IN OUR PLANET

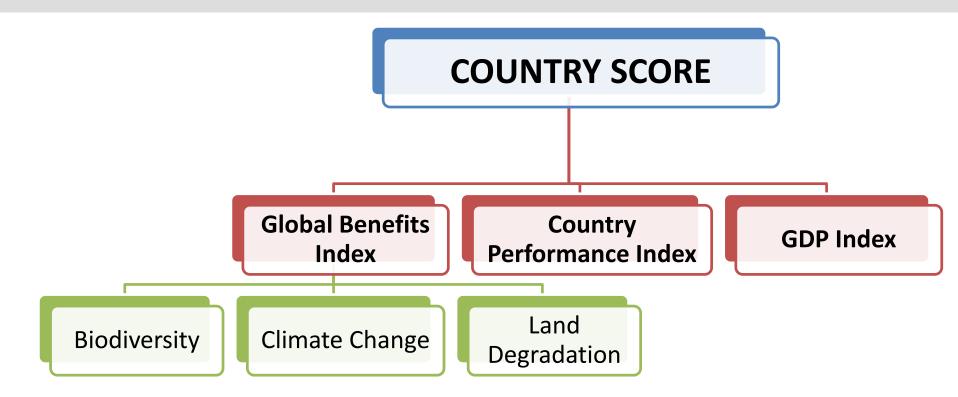

GLOBAL ENVIRONMENT FACILITY

The main indices

- <u>Global Benefits Index</u>: measures a country's relative share of GEF potential benefits that can be generated by a fixed amount of resource input into a focal area
- <u>Country Performance Index</u>: measures a country's performance and capacity to deliver potential global environmental benefits
- <u>GDP Index</u>: designed to increase allocation of countries

with a low GDP per capita GLOBAL ENVIRONMENT FACILITY INVESTING IN OUR PLANET

The country score

Country Score = GBI^{0.8} CPI ^{1.0} GDP^{-0.08}

Preliminary country allocations

- Country Share =
 - Country Score / Sum of Country Scores for all eligible countries

Preliminary Allocation =
Country Share * Available Focal Area Funds

Floors and Ceilings

Focal Area	Floor for LDCs	Floor for Non LDCs	Ceiling %	Ceilings (US Mn)
Climate Change	3	2	10%	126
Biodiversity	2	1.5	10%	129.6
Land Degradation	1	0.5	10%	43.1

Final allocations

 Adjustments for floors and ceilings mean there is a surplus or deficit relative to the preliminary allocation

 This is then allocated among countries using the country scores

 Process iterates until the full amount has been allocated among countries

gef

GLOBAL ENVIRONMENT FACILITY INVESTING IN OUR PLANET

Flexibilities and marginal adjustment

- Flexibilities relate to the utilization(not allocation) of GEF resources
- Countries are allowed to adjust their focal area allocations (but not their total envelope)

Total Allocation X	Allowed Marginal Adjustment		
$X \le 7$ million	unlimited		
X > 7 million	2 million		

Approximate Calculation: Trinidad and Tobago

	BIODIVERSITY	CLIMATE CHANGE	LAND DEGRADATION		
GBI	0.21	0.12	0.30		
СРІ	3.65				
GDPI	17934.06				
COUNTRY SCORE (GBI ^{0.8} CPI ^{1.0} GDP ^{-0.08})	0.48	0.306	0.63		
SUM OF COUNTRY SCORES	174.45	147.30	189.39		
COUNTRY SHARE	0.002753	0.00208	0.00333		
FOCAL AREA ALLOCATION	1051	941	346		
PRELIMINARY COUNTRY ALLOCATION	2.89	1.96	1.15		
FINAL COUNTRY ALLOCATION	2.78	2.29	1.14		
TOTAL ALLOCATION = 6.22 MILLION (FULLY FLEXIBLE COUNTRY)
