Leadership
THE SHIFT:
Orientation of our approaches to empowerment of people and Institutions to save and protect wildlife and wildlands.
Sabyinyo Silverback, community Lodge, Rwanda
THREATS

- Limited **African** sense of *ownership* and *stewardship* of wildlife and wild lands
- Limited influenced of the **African Constituency** for conservation
- Inefficient and **unplanned utilization** of land and natural resources
To engage and support leadership at all levels, including NGOs, in their efforts to stabilize Africa’s wildlife habitats, protect wildlife and wildlands, eliminate illegal wildlife trade and ensure the development of Africa is inclusive and green.
The vision is of an Africa where sustainable development includes thriving wildlife and wild lands as a cultural and economic asset for Africa’s future generations.
To believe in African Leadership & integrity. We are most successful when our results are owned and carried forward by the citizens of Africa.
To promote prosperity that is holistic and pragmatic, creating sustainable conservation gains.
To be successful we need to provide a voice for African wildlife. Primary advocate should be the young Africans.
The Africa of the next 50 years and the place for wildlife, is being determined by the decision leaders are making today – on economic growth.
Thank you!
