The GEF-7 System of Transparent Allocation of Resources (STAR)

GEF Expanded Constituency Workshop (ECW)
St Lucia
2019
Background

• The mechanism by which GEF resources are allocated to countries in three focal areas – Biodiversity, Climate Change, and Land Degradation

• STAR aims to allocate scarce GEF resources in order to:
  ➢ maximize impact on the global environment
  ➢ promote sound environmental policies and practices
  ➢ meet Convention requirements
  ➢ match country-driven priorities
Calculating STAR Allocations

1. Available Focal Area Funds
2. Calculate “Country Scores”
3. Calculate Preliminary Country Allocations
4. Adjust for Floors and Ceilings
5. Obtain Final Allocations
6. Determine post-allocation Flexibilities
Available Focal Area Funds

- Total Envelope
- Focal Areas
- STAR Focal Areas
- Less Set Asides
- Country Allocations

GLOBAL ENVIRONMENT FACILITY
INVESTING IN OUR PLANET

www.theGEF.org
Calculating STAR Allocations

1. Determine Available Focal Area Funds
2. Calculate “Country Scores”
3. Calculate Preliminary Country Allocations
4. Adjust for Floors and Ceilings
5. Obtain Final Allocations
6. Determine post-allocation Flexibilities
The STAR Indices

Global Benefits Index
- Biodiversity
  - Marine
  - Terrestrial
- Climate Change
  - Emissions
  - Forestry
- Land Degradation
  - Drylands
  - Area Affected by Land Degradation
- Rural Population

Country Performance Index
- GEF Portfolio Performance
- Institutional Assessment
- Public Sector Management and Institutions
- Policy and Institutions for Environmental Sustainability

GDP Index
- GDP per capita

Country Score = $GBI^{0.8} CPI^{1.0} GDP^{-0.12}$
Calculating STAR Allocations

1. Determine Available Focal Area Funds
2. Calculate “Country Scores”
3. Calculate Preliminary Country Allocations
4. Adjust for Floors and Ceilings
5. Obtain Final Allocations
6. Determine post-allocation Flexibilities
Preliminary Country Allocations

- **Country Share** = 
  
  Country Score / Sum of Country Scores for all eligible countries

- Preliminary Allocation = 
  
  Country Share * Available Focal Area Funds
Calculating STAR Allocations

1. Determine Available Focal Area Funds
2. Calculate “Country Scores”
3. Calculate Preliminary Country Allocations
4. Adjust for Floors and Ceilings
5. Obtain Final Allocations
6. Determine post-allocation Flexibilities
## Floors and Ceilings

<table>
<thead>
<tr>
<th>Focal Area</th>
<th>Floor for LDCs (US$ million)</th>
<th>Floor for non-LDCs (US$ million)</th>
<th>Ceiling %</th>
<th>Ceilings (US$ million)</th>
</tr>
</thead>
<tbody>

Calculating STAR Allocations

1. Determine Available Focal Area Funds
2. Calculate “Country Scores”
3. Calculate Preliminary Country Allocations
4. Adjust for Floors and Ceilings
5. Obtain Final Allocations
6. Determine post-allocation Flexibilities
Final Allocations

- Adjustments for floors and ceilings mean there is a surplus or deficit relative to the preliminary allocation.
- This is then allocated among countries using the country scores.
- Process iterates until the full amount has been allocated among countries.
Calculating STAR Allocations

1. Determine Available Focal Area Funds
2. Calculate “Country Scores”
3. Calculate Preliminary Country Allocations
4. Adjust for Floors and Ceilings
5. Obtain Final Allocations
6. Determine post-allocation Flexibilities
### Flexibilities and Marginal Adjustments

- Flexibilities relate to the utilization of GEF resources.

<table>
<thead>
<tr>
<th>If total STAR allocation is...</th>
<th>Allowed Marginal Adjustment is:</th>
</tr>
</thead>
<tbody>
<tr>
<td>...less or equal to $7 million</td>
<td>Unlimited (&quot;fully flexible&quot;)</td>
</tr>
<tr>
<td>...larger than $7 million</td>
<td>$2 million or up to 13% of their total STAR allocations.</td>
</tr>
</tbody>
</table>

Question 1

Country A has the following STAR allocations:

- Biodiversity = $4 million
- Climate Change = $4 million
- Land Degradation = $2 million

(a) Does this country have full flexibility in the use of its resources? Why, or why not?

(b) Is this country allowed any marginal adjustment across focal areas? If so, how much?
Question 2

Country B has the following STAR allocations:

- Biodiversity = $2 million
- Climate Change = $2 million
- Land Degradation = $1 million

(a) Does this country have full flexibility in the use of its resources? Why, or why not?

(b) Is this country allowed any marginal adjustment across focal areas? If so, how much?
Thank You
