RAISING AMBITION FOR CLIMATE ACTION: A CONVERSATION WITH WINNERS OF THE GLOBAL YOUTH VIDEO COMPETITION 2018

Description:

Young generations occupy a unique position in relation to the threat of climate change. Unlike with other environmental challenges, the most severe impacts of climate change will affect future generations, who will be forced to address the threat and make radical transformations possible.

UN agencies agree that mobilization and involvement of youth is key for raising ambition of NDC and critical for implementation of Paris agreement. What does this mean in practice? What can young people do to address climate change? What role can they play in implementation of Paris Agreement? How can international organizations help? We want to hear from you!

Join us for a frank discussion with the UNFCCC Focal Point for Climate Education and Youth, the climate champions and winners of Global Youth Climate Video Competition, and the GEF Small Grants Programme in the GEF Partnership Pavilion, Zone H.

PANELISTS:

Ms. Adriana Valenzuela,
Youth and Education Focal
Point, UNFCCC

Mr. Sebastian Lonak,
University of Silesia, Poland

Mr. Bernis Trejos,
Nicaraguan Conservation
Center, Nicaragua

Mr. Vikas Yadav,
Video Competition Winner,
