

Private sector engagement and blended finance program

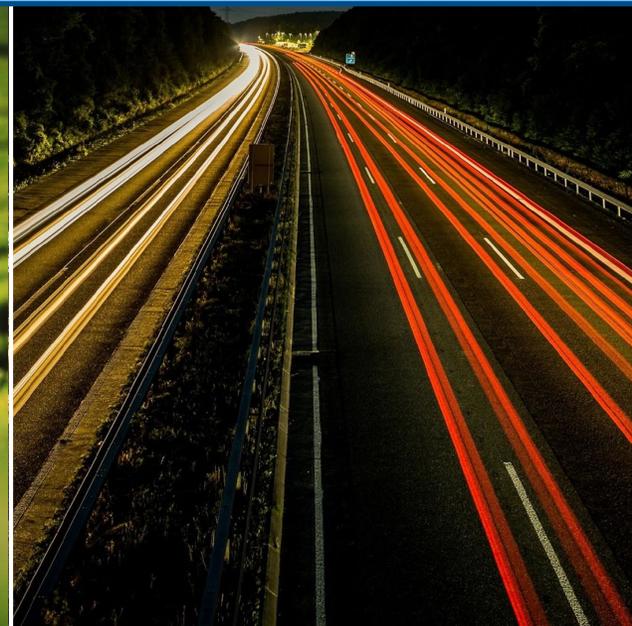

GEF Introduction Seminar 2021 | Day 2, February 23

GEF Private Sector Engagement

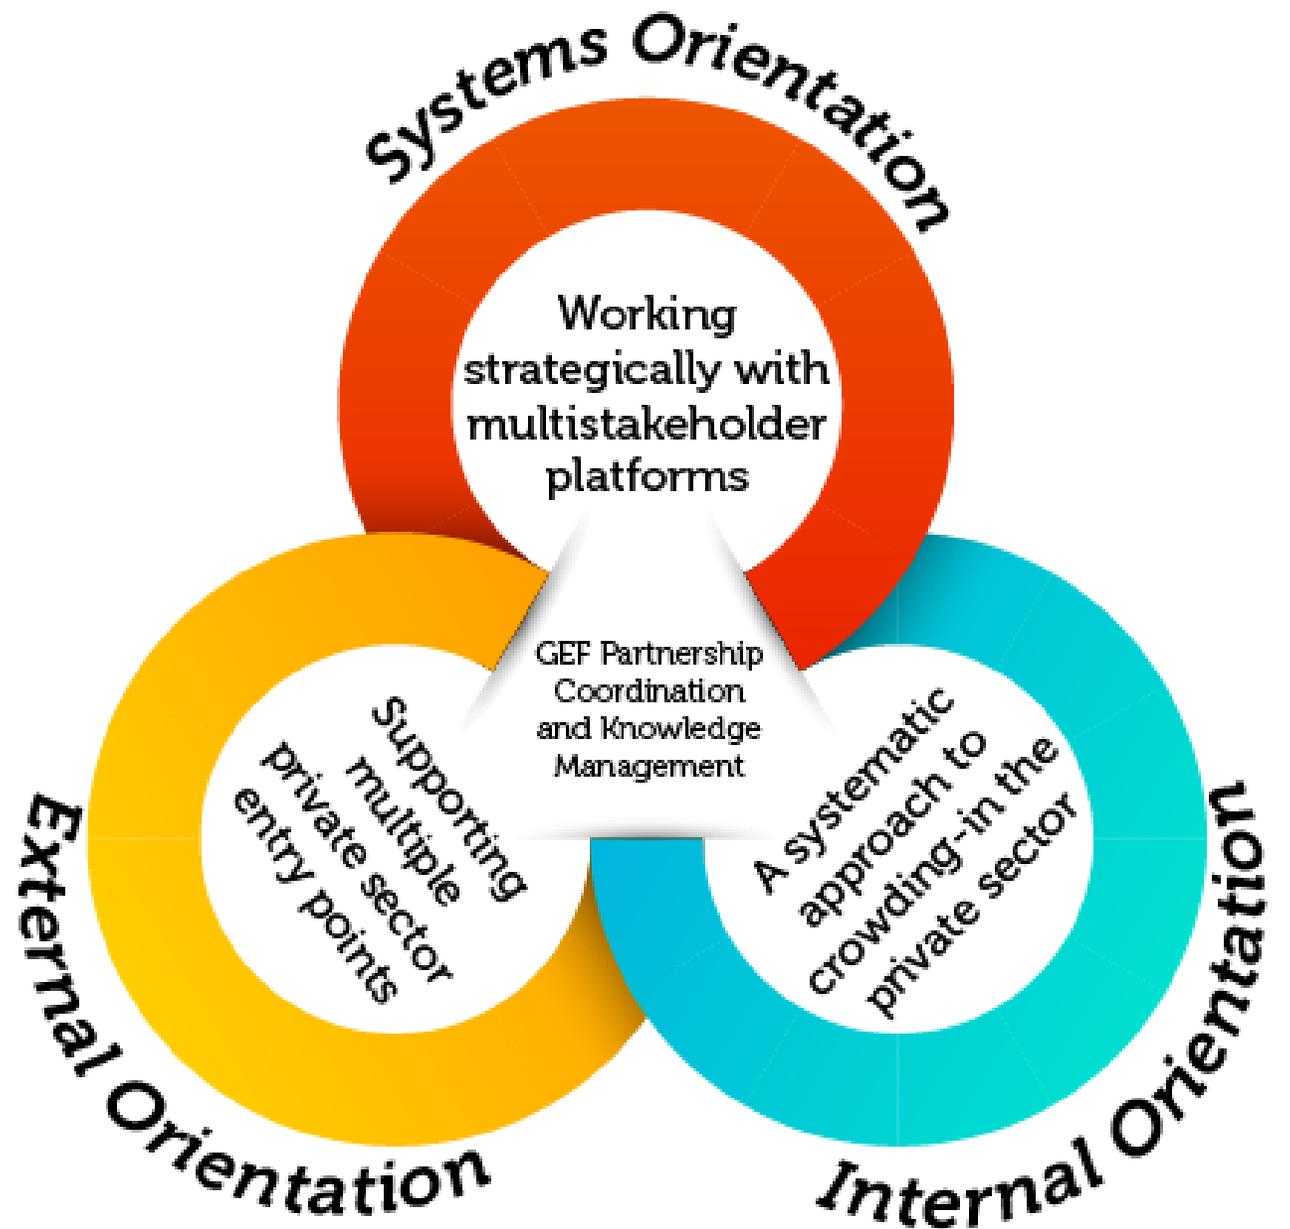

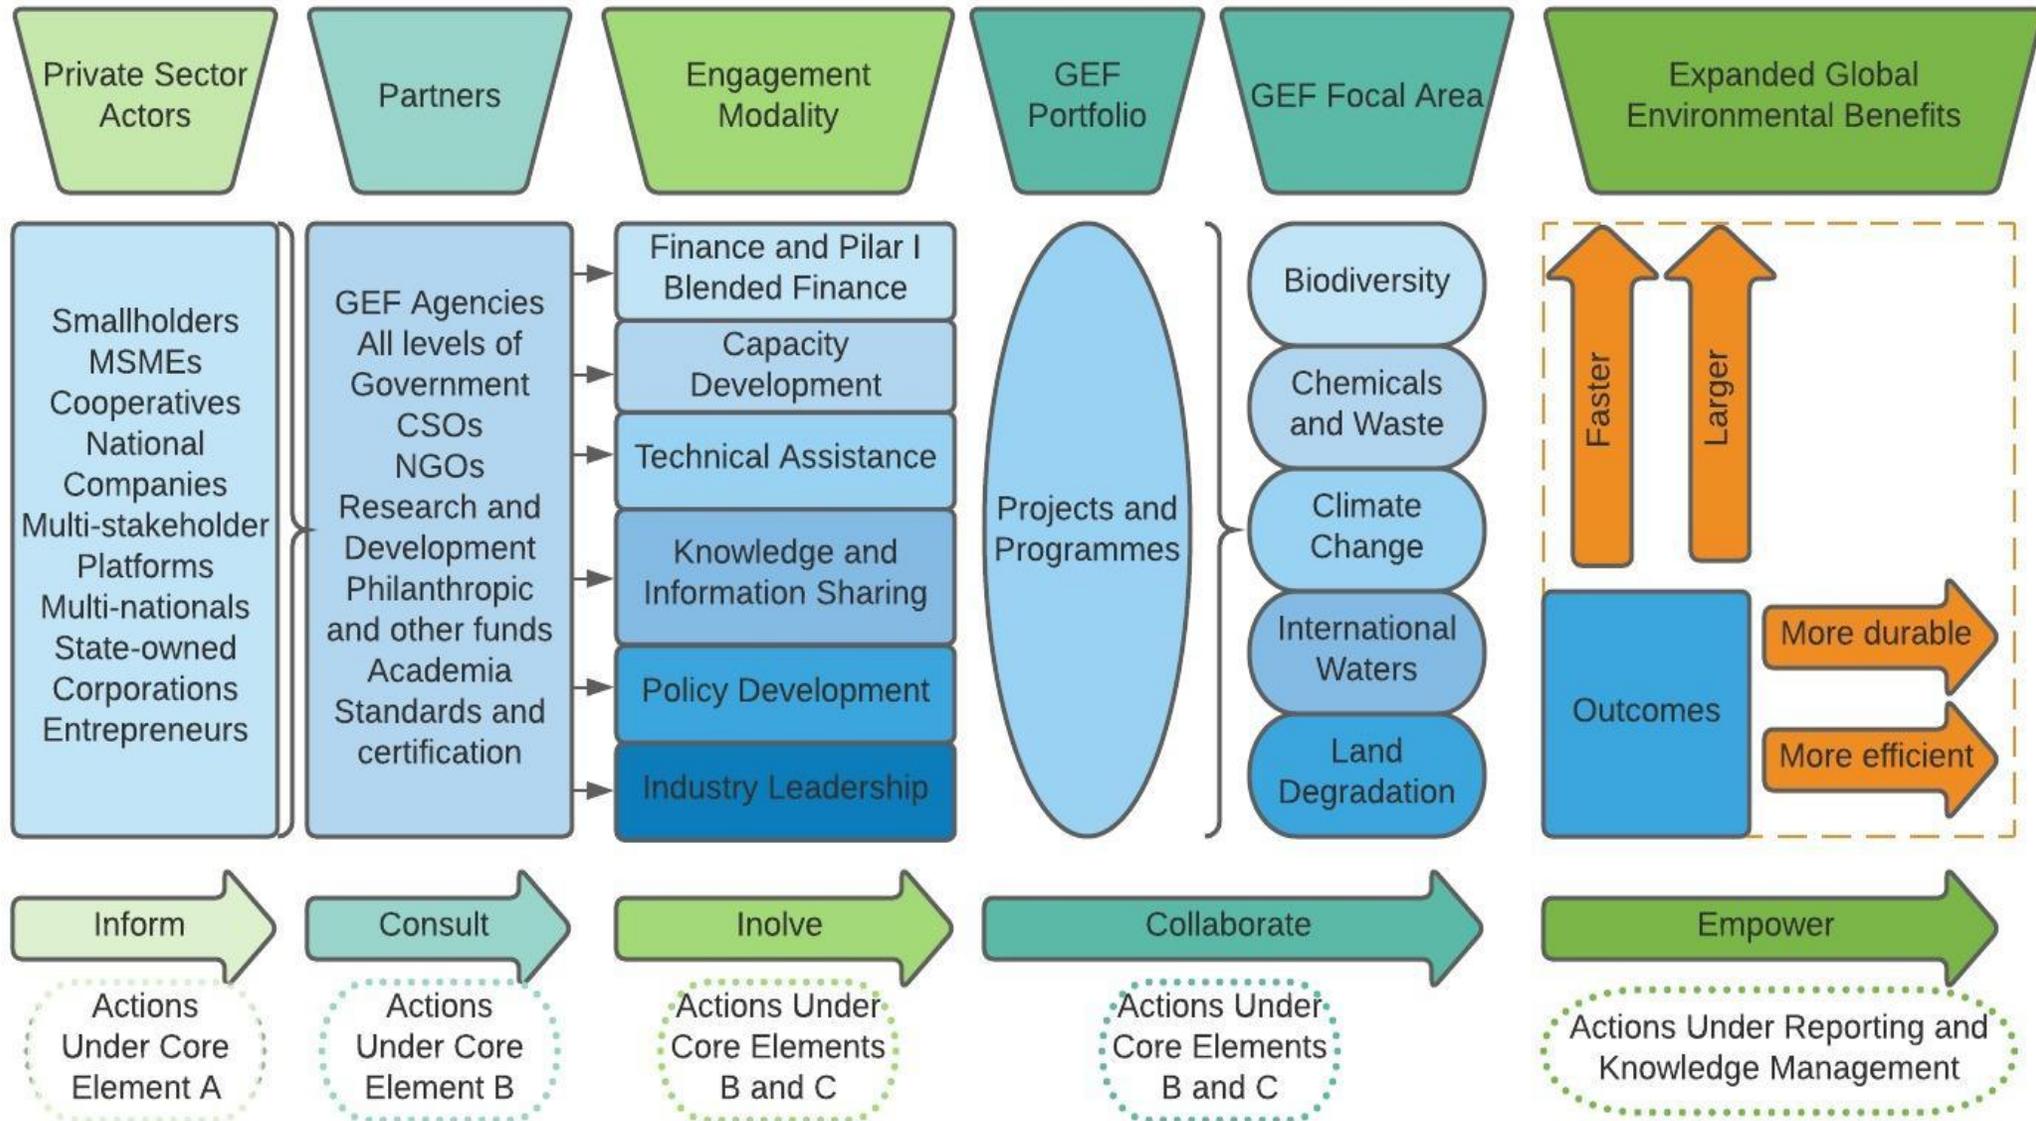

PRIVATE SECTOR ENGAGEMENT: BRINGING SPEED, SCALE AND DURABILITY

PSES Core Elements

PSES NARRATIVE FLOWCHART

GEF-7 is investing into the major systems that are identified as providing the most economic value to business from meeting SDGs

Energy and Materials
US\$4.3 trillion

Food and Agriculture
US\$2.3 trillion

Cities and Urban Mobility
US\$3.7 trillion

Health and Well-being
US\$1.8 trillion

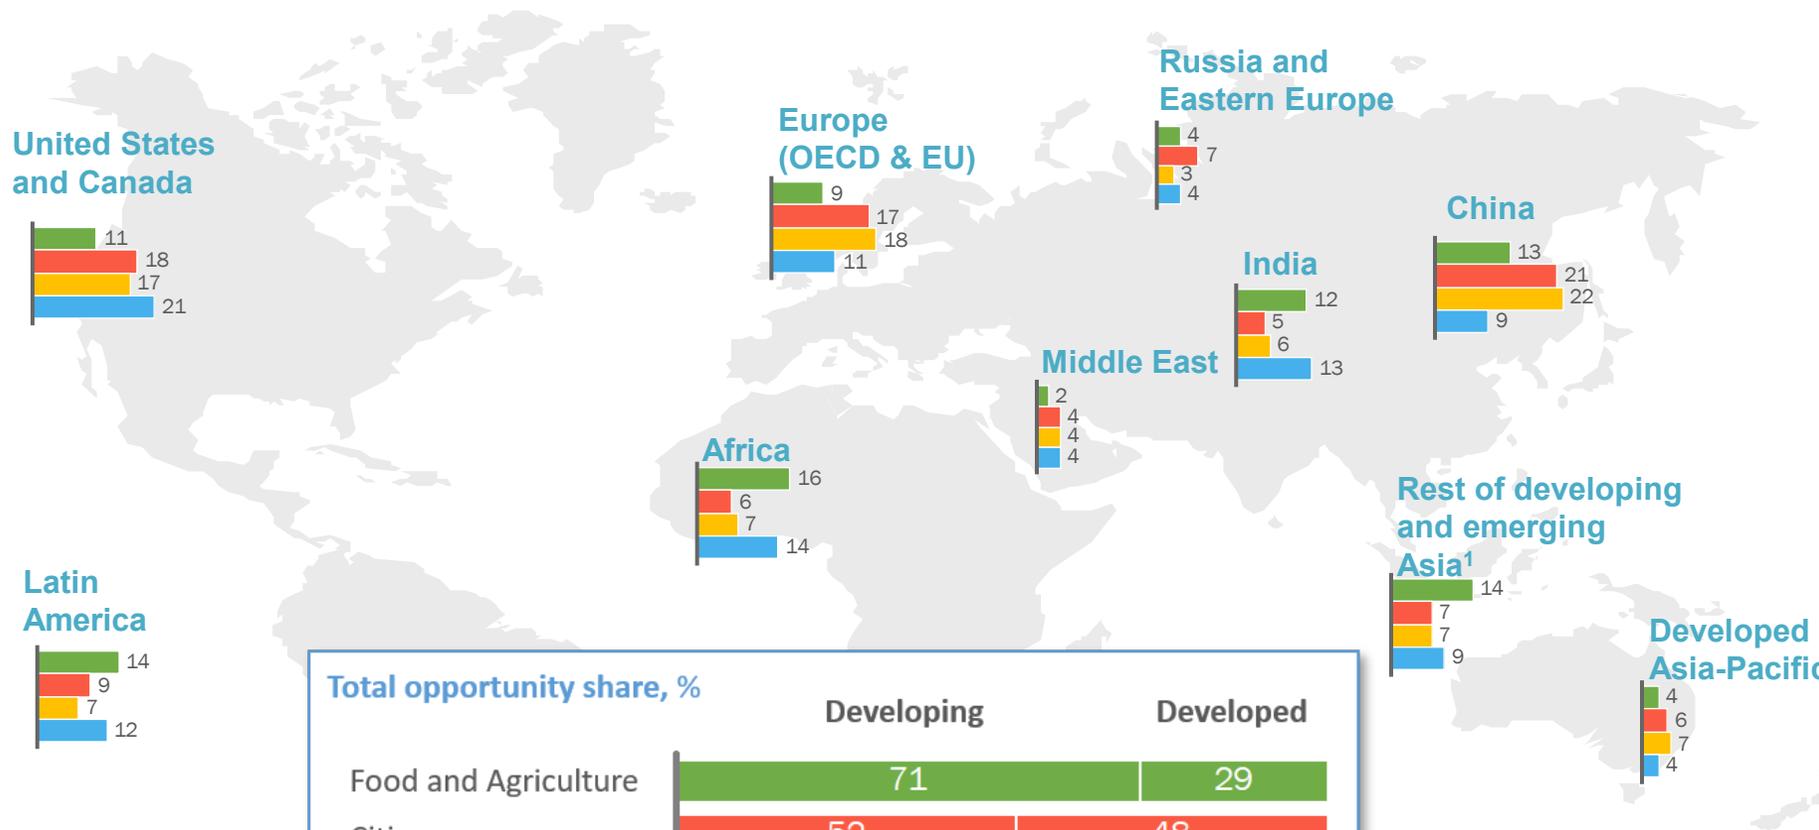

Achieving the SDGs would unlock

**\$12 trillion
a year**

in business value across
four economic systems
alone by 2030

Creating
more than
**380 million
jobs**

Distribution of Business Opportunities

Total opportunity share, %	Developing		Developed	
	Green	Red	Yellow	Blue
Food and Agriculture	71	29		
Cities	52	48		
Energy and Materials	54	46		
Health and Well-being	60	40		

GEF Private Sector Engagement Reviews

Reviews by the Independent Evaluation Office have found:

- A low level of incentive or pathways for private sector collaboration
- Lack of interest at the country level in private sector engagement
- Few opportunities for engagement that have been presented to the private sector
- Difficulty on all sides in understanding the entry points for private sector collaboration
- Business is not engaged from the outset of project development, therefore making it harder to engage business at later stages and throughout the project lifecycle
- The focus has been on financial contributions to the GEF fund, rather than on engagement and partnerships

Findings of Previous GEF Private Sector Engagement Reviews

However, the good news!

GEF investments involving the private sector have delivered:

- Higher levels co-financing compared to the average
- Balanced regional distribution of investments and projects
- Actions that address the drivers of environmental degradation

Leading Examples of GEF Private Sector Engagement

- The GEF enlisted the support of major palm oil producers who have committed to “zero-deforestation” palm oil production, facilitating training and capacity building for small-holders that form the foundation of the supply chain. In Paraguay, McDonalds joined this initiative to support zero-deforestation beef production.
- Major appliance and equipment manufacturers such as Philips, Osram, ABB, MABE are supporting the Sustainable Energy for All effort to accelerate energy efficiency and leapfrog developing markets to more efficient equipment
- The Maritime Trading Organization and major shippers committed voluntarily to an international regulatory framework which reduces the spread of invasive species through the **Globallast Program**, leading to formal adoption of the approach in the Ballast Water Management Convention (BWM) in 2017
- The GEF Gold partnership **PlanetGold** which aims at taking mercury out of the supply chain, builds a bridge between suppliers and corporate consumers of gold, such as computer, high end jewelry, as well as financial sector, enabling new approaches to reduce harmful mercury emissions across the full supply chain
- GEF’s early support for water funds in Latin America fostered partnerships between public and private, urban and rural, to provide protection for vital catchment zones.

- V. Q&A

I. What is Blended Finance?

- **Blended finance** is the targeted use of **concessional finance** in projects where actual or perceived risks are too high for commercial finance alone.
- The GEF Blended finance initiative or **Non-Grants Instruments Program (NGI Program)** focuses on the use of financial products other than grants: **debt, equity, guarantees** to attract private investment.

II. GEF's history in Blended Finance

- **GEF has experimented with Blended finance since 2008.** Initially focusing on renewable energy and energy efficiency but lately moving to “**frontier**” areas such as land degradation, biodiversity, and international waters where private sector investment is scarce.

- In GEF-6, the **Non-Grant Instrument Pilot** resulted in 9 projects accounting for USD 99.5 million in GEF funding while attracting USD 1.79 billion in co-financing (co-financing of 1:17).
- In GEF-7, the blended finance initiative became the **Non-Grant Instrument Program (NGI Program)** with **USD 136 million**. So far, the GEF Council has approved **8 projects for USD 109.5 million** with a co-financing ratio of **1:14**.
- **There is high demand for blended finance.** In the three calls for proposals closed to date, we received **28 project proposals for more than USD 400 million** more than tripling the available amount in the blended finance envelope.

III. GEF's goal Blended Finance

- The GEF will target investments with a potential to **transform industries, create novel financial products, or test new asset classes** that are important to the future of the planet yet are challenging for financiers without GEF support.
- The GEF encourages deal origination **in frontier sectors** such as circular economy, conservation of endangered species, shipping industry pollution, sustainable agriculture, and nature-based solutions to increase resilience.

III. GEF's goal Blended Finance: project Examples

GEF-6

15 LIFE ON LAND

 Title: eGreen Fund
 GEF Agency: United Nations Environment Programme (UNEP)
 Instrument: Redeemable Grant
 GEF Investment: \$2 million
 Co-financing: \$52 million

15 LIFE ON LAND

 Title: Moringa Agro-Forestry Fund for Africa
 GEF Agency: African Development Bank (AFDB)
 Instrument: Junior Equity
 GEF Investment: \$12 million
 Co-financing: \$50 million

14 LIFE BELOW WATER

 Title: Blue Bonds for the Third South West Indian Ocean Fisheries Governance a Shared Growth Project (SWIOFish3)
 GEF Agency: World Bank
 Instrument: Concessional Debt
 GEF Investment: \$5 million
 Co-financing: \$32 million

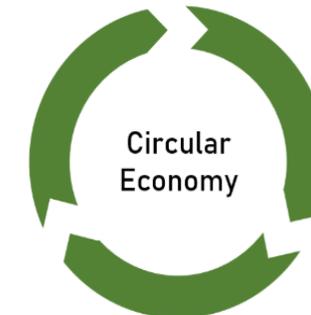

Title: **Wildlife Conservation Bond**
 GEF Agency: WBG
 GEF Investment: \$15 million
 Instrument: Reimbursable grant
 Co-financing: 1:10

Title: **Green Shipping Initiative**
 GEF Agency: IFC
 GEF Investment: \$15 million
 Instrument: Mezzanine debt
 Co-financing: 1:10

Title: **Livelihoods Funds III**
 GEF Agency: CI
 GEF Investment: \$15 million
 Instrument: Equity
 Co-financing: 1:8.3

Title: **Circular Economy Initiative**
 GEF Agency: EBRD
 GEF Investment: \$15 million
 Instrument: Performance Based Loan
 Co-financing: 1:10

GEF-7

IV. Competitive process to select blended finance projects

Similarities and differences with other GEF projects

What remains business as usual in NGI:

- NGI follows the GEF Project and Program Cycle Policy and Guidelines.
- Importance of **GEBs** and compliance with **GEF- 7 Programming Directions**

What is different in NGI:

- **Competitive process:** projects are selected through rounds of open calls for proposals. Each proposal is evaluated on the basis of **Selection Criteria** and **Eligibility Criteria**.
- **Support of the AFGE:** GEF formalized its collaboration with the Advisory Group of Finance Experts (AGFE) for GEF-7. The AGFE reviews are non-binding and are provided on a pro-bono basis as an additional input to the review process conducted by the GEF Secretariat. Members are Joan Larrea, Ken Lay and Pat Coady.
- **Detailed termsheet** to evaluate financial aspects of the proposals.
- **Timeline:** PIFs and PFDs are requested to be submitted earlier than the standard deadline to allow for additional review of the AGFE.

IV. Competitive process to select blended finance projects

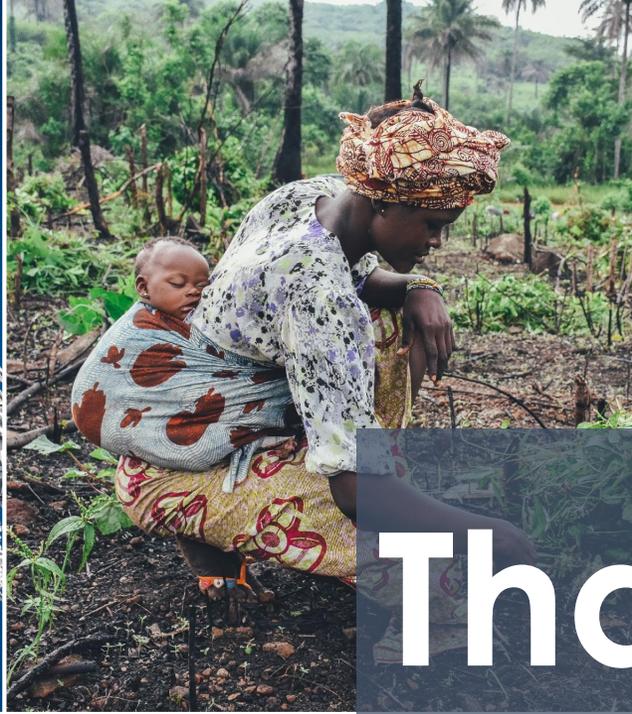

Selection Criteria and Eligibility Criteria

Selection Criteria

Scalability	Appropriate levels of co-financing	Attractive financial terms	High Financial Additionality	Capacity to generate reflows	Innovation	Project execution	GEBs
Do financial structures or investment platforms aim at scaling-up projects beyond a “one-by one” projects?	Is the project in line with the intended impact of the project and in the context of each focal area capacity?	Are the terms and conditions of the GEF investment adequate to achieve acceptable financial terms for private investors to participate in the project?	Does the project show high financial additionality in terms of (i) financing barriers addressed and (ii) quantification of financial additionality?	What is the likelihood of generating returns based on project characteristics, sound financial structure.?	Does the project show innovation in terms of the financial structure and/or the technologies used in the project?	Do executing agency have experience in projects with non-grant instruments and in management of reflows?	Proposals will be evaluated based on their contribution to GEF focal areas, Impact Programs and their capacity to generate global environmental benefits.

Eligibility Criteria

- Geography: project beneficiaries must be in eligible GEF recipient countries
- GEF Partner Agency eligibility requirements
- Modalities: middle-sized projects, full-sized projects and programs;
- Non-grant instruments Policy

Thank
you
