CORE INDICATOR

Contributions to the generation of global environment benefits

Terrestrial protected areas created or under improved management for conservation and sustainable use (Million hectares)

Marine protected areas created or under improved management for conservation and sustainable use (Million hectares)

Area of **land restored** (Million hectares)

Area of **landscapes under improved practices** (Million hectares ; excluding protected areas)

Area of **marine habitat under improved practices** (Million hectares ; excluding protected areas)

Greenhouse Gas Emissions Mitigated (Million Metric ton CO_{2e})

Number of shared water ecosystems (fresh or marine) under new or improved cooperative management

Globally over-exploited marine fisheries moved to more sustainable levels (Thousand metric tons)

Reduction, disposal/destruction, phase out, elimination and avoidance of chemicals of global concern and their waste in the environment and in processes, materials and products (Thousand metric tons of toxic chemicals reduced)

Reduction, avoidance of emissions of POPs to air from point and non-point sources (grams of toxic equivalent gTEQ)

Thank you
