

Sustainable Aquaculture and Food Security

An Event Organized by Responding to
Climate Change (RTCC)

December 5, 2019

9:00 - 10:30

Hall 8

GCF + GEF Pavilion

UNFCCC COP25

Economic growth and the rise in world population put pressure on food demands and Aquacultural products; feeding this population will require substantial changes to ensure the production, distribution and consumption of sufficient nutritious products, environmental sustainability and economic opportunities through aquaculture and technologies. By 2050 the world population will reach 9.1 billion - how can we feed everyone? Solutions?
