Part I – Project Information

Focal area elements

1. Is the project/program aligned with the relevant GEF focal area elements in Table A, as defined by the GEF 7 Programming Directions?

Secretariat Comment at PIF/Work Program Inclusion
Why the expected outcomes are the same for all BD Objectives?

Agency Response
April 7, 2020:

As discussed bilaterally, the outcomes for Biodiversity remain the same as the approved GWP PFD and align with the outcomes defined. No further change made.

Indicative project/program description summary

2. Are the components in Table B and as described in the PIF sound, appropriate, and sufficiently clear to achieve the project/program objectives and the core indicators?
Secretariat Comment at PIF/Work Program Inclusion
4-2-20

Yes. The structure of Table B is the same as the one of the PFD approved by Council in June 2029.

Co-financing

3. Are the indicative expected amounts, sources and types of co-financing adequately documented and consistent with the requirements of the Co-Financing Policy and Guidelines, with a description on how the breakdown of co-financing was identified and meets the definition of investment mobilized?

Secretariat Comment at PIF/Work Program Inclusion
Suggest changing this Investment Mobilized to Grant. Can be modified at CEO Endorsement of the corresponding country project.

In the description of the description of “Investment Mobilized” suggest removing “recurrent expenditures”, “staff support”, “use of equipment”. These read as “Recurrent Investments:

**Describe how any "Investment Mobilized" was identified**

The investments mobilized are potential leveraged resources based on engagement with partners and collaborators. And includes co-financing from various organizations such as civil society organizations, donor agencies, recipient governments, private sector and beneficiaries for both **recurrent expenditures** and investments mobilized through loans, **staff support**, **use of equipment**, corporate social responsibility, Public investments, etc. All the investment will be confirmed during the PPG phase. Co-financing sources and amounts are indicative at this stage.
Agency Response
April 7, 2020:

As discussed bilaterally, the cofinancing descriptions are aligned with the language in the approved GWP PFD and reflect the nature of the various contributions. No further change made.

As per GEF recommendation the classification of the source has been changed. The nature of the CSO contribution reported by IA is classified unknown. The IA will be informed.

April 14, 2020:

Co-financing from CSO (Pelindung Alam Malaysia) has been re-classified as “grant”.

GEF Resource Availability

4. Is the proposed GEF financing in Table D (including the Agency fee) in line with GEF policies and guidelines? Are they within the resources available from (mark all that apply):

Agency Response

April 7, 2020: Noted. Core indicator has been revised to change the sub indicator attribution.

However as agreed bilaterally and clarified, this level of detail was not provided for the countries in the original GWP at the PFD stage, as information is not available for all PAs individually in these early stages. Table 1 therefore only provides coordinates of those that were available and not the hectares. Therefore no further change has been made.

Secretariat Comment at PIF/Work Program Inclusion

Recommendations to Child Projects
The GEF Secretariat requests that in the preparation of the CEO Endorsements of the Child Projects in this Addendum, the Agencies and Governments consider the following requirements.
1. Focus on the most critical interventions. When selecting the activities to be funded by the project, make sure that only a few get selected, they are relevant to the problem in hand, the results are tangible and measurable, and the proposed interventions are doable within time and budget.

2. Allocate the necessary funds to tackle Illegal Wildlife Trade (live and dead animals). While the GEF is cognizant that the realities and needs on the ground are variable and that the type of support to address these threats will vary from country to country, it is imperative that these activities receive serious attention during project preparation and execution.

3. Ensure that the activities that will be carried out in the headquarters of the Government Agencies, are designed to directly benefit the operations of those on the ground tackling habitat degradation and Illegal Wildlife Trade.

4. Engage with the local communities. It is imperative for them to understand the project, and see the direct and indirect benefits that they can derive. While receiving direct benefits is usually the first and most common request from local communities, projects need to make emphasis in the medium- and long-term benefits in securing the target geographies, including Protected Areas, and the conservation of the threaten species. Additionally this is critical to the sustained impact of project activities.

**PIF Recommendation to CEO**
Brief reasoning for recommendations to CEO for PIF Approval

CONTEXT: Habitat destruction and illegal wildlife trade have devastating impacts on the populations of numerous wildlife species around the world. Illegal wildlife trade is associated with the demand for wildlife and wildlife products from markets around the globe but primarily from Asia and SE Asia. While IWT is usually associated with large and iconic species like the African elephants and rhinos, Asian tigers and snow leopards, and jaguars of Latin America, it is also affecting myriad of smaller species. For example, pangolins, the most poached animal in the world, are traded for its scales and meat, parrots and amphibians are exploited for the illegal pet trade, and reptiles for their skins. The Global Wildlife Program (GWP) aims to reverse the decline in wildlife populations due to illegal trade and promote wildlife conservation for sustainable development. To achieve these objectives, the program is investing financial and technical resources on three fronts: i) Conservation of Habitats and Wildlife; ii) Promotion of a Wildlife-based Economy; and iii) Combating Wildlife Trafficking. The GWP builds on lessons learned of the GEF-6 GWP and introduces innovative features in GEF-7 that aim to protect the assets of the “Green Infrastructure” (habitats and wildlife) and leverage them as “engines of economic growth and inclusive development”. This addendum updates the information provided in the GWP Program Framework Document (PFD) approved by the GEF Council in June 2019.

PROJECTS: This Addendum presents 5 projects in Africa (Nigeria and South Africa) and 2 in Asia (Bhutan, Malaysia and Pakistan). The project in Nigeria “Improved Management Effectiveness of Gashaka-Gumti and Yankari Protected Areas” aims at conserving threatened wildlife species, build a wildlife economy and enhance community benefits. The project in South Africa “Reducing Human Wildlife Conflict through an Evidence-based and Integrated Approach in Southern Africa” aims at creating an enabling environment and evidence-based approach on mitigating the effects of human-wildlife conflict in the SADC region. The project in Bhutan, “Mainstreaming biodiversity conservation into the tourism sector in Bhutan” aims at mainstreaming biodiversity conservation into tourism development and promote Bhutan as a model ecotourism destination. This strengthens knowledge exchange opportunities on human-wildlife conflict mitigation and on nature-based ecotourism development. The project in Malaysia “Building institutional and local capacities to reduce wildlife crime and enhance protection of iconic wildlife in Malaysia” aims at enhancing the protection of iconic wildlife species and their habitats in Peninsular Malaysia, Sarawak and Sabah. The project in Pakistan “Strengthening Governance and Capacity for Combating Illegal Wildlife Trade in Pakistan”.

SELECTION CRITERIA: The criteria used for a national project to be included under the program was the inclusion of activities that were categorized either under Preventing the Extinction of Known Threatened Species and/or on Wildlife for Sustainable Development as per the GEF-7 Programming Direction document, and alignment with the approved GEF-7 GWP PFD results framework. This framework included the following components: (i) Conserve Wildlife and Enhance Habitat Resilience; (ii) Promote Wildlife-based and Resilient Economies; (iii) Combat Wildlife Trafficking; (iv) Reduce Demand and Disrupt Markets; and (v) Cooperation and Enhance Learning. Country-based projects focused on designing and implementing national strategies and approaches to improve wildlife and protected area management, enhance community livelihood benefits, reduce poaching, and curtail illegal wildlife trade and reduce demand. Individual country projects may address a single component or include activities that address more than one.

GLOBAL ENVIRONMENTAL BENEFITS: The child projects of the GWP Addendum will contribute to increase the management effectiveness of 3.1 million hectares and protect a number of threaten species including the Malayan tiger, Bornean Orangutan and Bornean banteng in Malaysia, tiger, leopard, musk deer and
Himalayan black bear in Bhutan, Nigeria-Cameroon Chimpanzee as well as leopard in Nigeria, Indian pangolin, Common leopard and Snow leopard in Pakistan, and African elephants in South Africa.

CO-FINANCING: The Co-financing of this GEF $16.0 million addition to the GWP is $108.2 million. The co-finance, provided by Government’s Ministries and Agencies, International and Local NGOs and the GEF Agencies, is $59.9 million in Investment Mobilized and $167.6 million in recurrent expenditures.
