Dear colleagues,

Spain has no objections regarding the approval of the SCCF proposed intersessional work program. The PIFs detailed in the program are also acceptable.

Regarding the project **Indonesia "Strategy Planning and Action to Strengthen Climate Resilience of Rural Communities in NTT Province"**, we value as very positive the establishment of consultations during the definition of the project -in order to avoid duplication of work and a more efficient use of resources- as well as the strengthening of national institutions through capacity building activities and the link of this project with food security and gender issues.

The expected outcomes and outputs of the project for "**Increasing Climate Resilience trough Drinking Water Rehabilitation in North Tajikistan**" (GEFID 4263) are considered complete and appropriate. In our view the combination of both rehabilitation of water supply infrastructure and implementation of a tariff reform with consumers' implication through education campaigns is especially relevant.

Best regards,

Beatriz Escolar
